## APPROVAL OF STATE ENGINEER.

This is to certify that I have examined the foregoing application and do hereby grant the same, subject to the following limitations and conditions:

The intent and purpose of this application is to change the use of water from the West Fork of the Walker River, through the Wheeler Ditch, to the East Fork of said Walker River, to be diverted through the Hilbun Ditch. The application is approved with the understanding that no prior existing rights will be affected by such change, and that no additional rights are granted herein.

Reference to Decree No. 731, emanating from the U. S. District Court for the District of Nevada in the case of the Pacific Live Stock Co. vs. T. B. Rickey, et al., shows that the applicant was decreed 1.08 cubic feet of water per second for the irrigation of 90 acres of land from the East Fork of the Walker River, and 0.12 of a cubic foot of water per second for the irrigation of 10 acres of land from the West Fork of said Walker River. Thus, it appears that, in order to perfect this change, it will only be necessary to grant this application for a change of 0.12 of a cubic foot of water per second for the 10 acres of land which was decreed a right from the West Fork of the Walker River. However, it is understood that the application is approved for the purpose sought to be accomplished, namely the change of the use of the full amount of 1.2 cubic feet of water per second, as above mentioned, from the Wheeler Ditch to the Hilbun Ditch.

It is <sup>also</sup> understood that the conditions of the approval of this application, as regards the extent of the water right which is taken as a basis for the change allowed, are subject to such subsequent modification as may be made in Decree No. 731 heretofore mentioned. It is further understood that the applicant assumes the responsibility as to the legality of the change permitted by the approval of this application, in view of the fact that a right is transferred from the West Fork of the Walker River to the East Fork of said River.

The State reserves the right to regulate the use of water under the change authorized by this permit at any time in accordance with the stipulation, or any modification thereof, in said U. S. District Court Decree No. 731 to which reference is heretofore made.

The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to exceed the amount above specified.

Actual construction work shall begin on or before July 27, 1920.  
Proof of commencement of work shall be filed before Aug. 27, 1920.  
Work must be prosecuted with reasonable diligence and be completed on or before July 27, 1920.

Proof of completion of work shall be filed before Aug. 27, 1920.  
Application of water to beneficial use shall be made on or before November 27, 1920.

Proof of the application of water to beneficial use must be filed with State Engineer on or before December 27, 1920.
